

FT Series - Coffee/ Tea Bag Sealer for Thick Gusset Pouch

FT-130 and 230 sealers are ideal for packaging thick gusset pouches of up to 0.5mm/ 19.6mil thickness. This type of impulse sealer is typically used in coffee and tea shops. Clamping the pouch requires powerful pressure and heat capable of melting the bag, which ordinary sealers cannot produce. FT series sealers heat the bag from both the bottom and the top (double heating method), through powerful sealing pressure. The FT plastic heat sealers are capable of sealing bags with a total film thickness of up to 0.5mm/ 19.6mil. Main Features

- Package films can be sealed easily and quickly without any special skills.
 - Only pull the handle toward you to make a strong sealing.
 - Sealing pressure can be adjusted for optimum sealing.
 - Compact, light and portable. Electronic timer controls sealing temperature.
 - Daily use frequency as model selection guideline: Up to 1,000 bags, hand-operated
 - Compatible packaging materials (total thickness of two or more sheets):
- PE 0.6mm , PP 0.4mm, NY 0.4mm, PVA 0.4mm, and other laminated material 0.5mm.
