

IM Series -Rust Preventive Packaging Material

IM series has an excellent piercing and peel tensile strength along with the long-term rust prevention effect. It is effective on both ferrous and non-ferrous metals. The color of IM series is semi-transparent so the packaging content can be seen from outside. IM series is suitable used in the following situations: when you want to preserve the automobile or precision parts for a very long time or pack for the transportation them in a hot and humid place.

- Composition: Special PE
- Thickness: 0.05mm
